## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 3\_Q1

Attempt : 1  
Total Mark : 10  
Marks Obtained : 10

#### Section 1 : Coding

##### 1. Problem Statement

Rosh is intrigued by numerical patterns. Today, she stumbled upon a puzzle while working with arrays. She wants to compute the sum of the third-largest and second-smallest elements from a list of integers. She seeks your help to implement a program that solves this for her efficiently.

##### ***Input Format***

The first line of input is an integer N, representing the size of the array.

The second line of input consists of N space-separated integers, representing the elements of the array.

##### ***Output Format***

The output displays a single integer representing the sum of the third-largest and second-smallest elements in the array.

Refer to the sample output for the formatting specifications.

**Sample Test Case**

Input: 10

10 20 30 40 50 60 70 80 90 100

Output: 100

**Answer**

// You are using Java

import java.util.\*;

class Main{

public static void main(String args[]){

Scanner sc=new Scanner(System.in);

int N=sc.nextInt();

int[] arr=new int[N];

for(int i=0;i<N;i++){

arr[i]=sc.nextInt();

}

Arrays.sort(arr);

int tl=arr[N-3];

int ss=arr[1];

int sum=tl+ss;

System.out.println(sum);

sc.close();

}

}

**Status : Correct**

**Marks : 10/10**
